

YOUR PERFECT SMILE

With just three months left until her wedding, Nina Bongkotpisut turned to specialist orthodontist Dr Gareth Ho so she could walk down the aisle with a perfect smile.

What inspired you to undertake dental work?

I had noticed that my teeth had moved and in photos I could see my teeth were crooked. I wanted the perfect smile for my wedding photos but there was only one problem – lack of time. There was just three months left before my wedding to have my teeth straightened.

What dental solutions did you choose?

I had braces to move my teeth into place.

What was involved in your treatment process?

The first step was to have an x-ray. Then the staff at Dr Ho's office took a digital photo of my smile, which they showed to me so Dr Ho could explain what was wrong with my teeth. I was then informed of the solutions available to fix my problem.

Did you feel safe and comfortable?

Yes, I definitely felt safe and comfortable throughout the whole process. I also felt that Dr Ho was listening to what I wanted and understood that I only had a short time to have my teeth perfected.

What were people's reactions after the treatment was completed?

Mostly people were surprised at the great results that had been achieved in such a short period of time.

How much did your treatment cost?

\$2600 for the Orthodontic Treatment.

Are you still receiving treatment?

Yes. I'm still having monthly check-ups with Dr Ho to make sure everything has settled down fine.

Would you recommend others to have dental work?

I have recommended the procedure to many of my friends and people who have asked me about braces. Dr Ho is fantastic – he is very professional, friendly, uses modern equipment and has so much knowledge in the area. I would recommend Dr Ho to anyone.
